                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | Not include                                                                                                                                | d in tot                                                 | al.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | #### THE FINANCIAL SITUATION.

Exports of gold have been a conspicuous feature of the week. Because the outflow has begun at a period of the year when imports of gold are usual, they have attracted more attention than they really deserve. The argument is, if gold goes out in the last three months of the calendar year, when our exports of merchandise are largest, what are we to expect the gold shipments will be the first quarter of the new year, when the body of our crops has been marketed. A threaten. ing aspect, which is not authorized, is thus given to the current gold outflow from New York by assuming it indicates that a full settlement has been made by Europe of our large past, and even of our present monthly, One does not need to merchandise exports. investigate that claim. Current imports of gold into the United States at a time when there is no real need here for that metal, while there is need for it in Europe, is clear proof that Europe is in our debt. Beyond doubt there has been a large amount of American securities long held in Europe sold here during recent years; there have also been other securities bought here by Europe within late years, a portion of which has since been returned and sold; likewise America has within five years placed considerable money in Europe. All this is true. But any summary of these movements and counter-movements would be pure estimate and furnish very vague data by themselves from which to build up a theory that our trade balance-old, new and current-has been

Were it worth one's while, it would be an easy matter to throw discredit on that claim by a compilation made up from a study of the security movement and the trade figures for the series of years subsequent to the adoption of specie payments in 1878. The size of the average favorable or unfavorable trade balance and the kind of security inflow or outflow which during that period was required to induce a movement of gold from Europe to the United States, or to Europe from the States, applied to similar trade compilations during the last five years, would afford a strong presumption against any such conclusion as that referred to. Moreover, it is well known that the present shipments of that metal are, for obvious reasons, special, and do not argue a larger outflow later. There may be a freer movement after the first of January, but if it occurs it will be special also. The truth is, Europe has for some time presented a disturbed trade situation, and has suddenly developed quite an acute financial strain. Berlin, Paris and London early in the week were all of them eager for gold, and the exchanges were reported in such shape that a movement set in from London to each of the other centres named. It looked for the moment as if a crisis of some severity might be imminent. That Paris should feel distressed for gold, with £94,000,000 in the Bank of France, seemed incredible and ominous. As it happened, however, the situation was not particularly serious. No sooner had the \$2,851,000 been withdrawn here on Wednesday for shipment to Paris than appearances on both sides of the Atlantic changed. Foreign exchange declined in New York, and the anxiety in Europe was reported by cable to have been for the time being stayed. What will be the effect of the subsequent advance by the Bank of England of its minimum rate to 4 per cent remains to be seen.

The cotton-spinning industry at Fall River has be come further involved. Last week Mr. Borden an. nounced an advance of 5 per cent in the wages of his print cloth mill operatives, to take effect Nov. 4 With the previous advance, which was announced the last week of September, he has within recent weeks added 10 per cent to the wages he pays. He says business conditions warrant the higher payment to the enployes. The managements of the other mills claim that the production of cloths does not even pay on the present scale of wages, and they have refused to announce any advance. In the meantime, Mr. Borden has also raised his standing offer for regulars to 31-16 cents. Odd goods he does not need, and they are in abundant supply; but of regulars there is a dearth at Fall River and it is stated that they are well sold up to production in other markets. Of course the fear was that the operatives in the mills refusing the advance would leave their work. The latest advices indicate that there will be no strike. We trust that will be the outcome; if it is, an opportunity will be offered of testing the situation. Experience during 1900-1901 had favored the belief that there were too many print cloth spindles in the United States to find profitable employment at full time. It will not take many months to determine whether the normal demand is or is not heavy enough to absorb current supply.

It would not be possible to specify any particular influence as dominating the stock market the past week, except that the sudden activity and great strength displayed in the last hour of trading yesterday afternoon was generally accepted as evidence of an impending settlement of the great questions involved in the Northern Pacific contest. Gold exports and currency accumulations in the Sub-Treasury have imparted a degree of uncertainty to the money market. An observer would find it difficult, though, to establish just what, if any, restraint these movements have put upon operations. The negotiations with reference to the settlement of the Northern Pacific affair have been reported by those who are most closely connected with the properties concerned as making hopeful progress, and the indications yesterday pointed strongly in the direction of a harmonious ending to the incident. But that has been the belief and expectation which has prevailed all along; it would be impossible that parties of the character of those involved, controlling such immense industrial interests, including quite a number of the most important railroads in the country-it would be impossible for them to act otherwise than in harmony. The copper situation when the week began looked ominous and exercised for a day or more a depressing influence; but later it has appeared from current reports to be getting into better shape through a reduction of the output of the mines, as it is claimed, in Europe as well as in America; a better course for remedying the congestion would have been, we think, by a drop in the price of copper, though the other method is a possible corrective. Probably the little incidents developing day by day which tend to contribute to a prosperous business outlook have had as large a part as anything in communicating the undertone of strength the market has manifested. For some weeks, among other occurrences having a similar purport, a feature of the daily news has been orders given

out by a large number of our railroads for steel rails and for new equipment, showing unusual proportions, and giving work to foundries, mills and factories for many months, running far into the new year; of the same character is a notable order given out by the New Haven railroad this week—large beyond precedent. The only existing unfavorable feature discoverable is the high price for many commodities.

Mercantile failures during the late month appear to have been on a slightly increased scale. According to the records kept by "Dun's Review," the liabilities of the defaulting concerns aggregated \$10,680,627 in October 1901, against \$9,072,791 in October 1900 and but \$5,665,745 in October 1899. It is pointed out, however, by the editor of the "Review" that the increase here disclosed possesses no special significance. He shows that half the total of liabilities is accounted for by twenty-five large failures, which have apparently followed from special causes, and that the average liability of all other insolvencies was only 85,984, which is less than the average of small failures in the corresponding month of any previous year since Dan has been keeping the record. It should also be remembered that comparison is with unusually small totals. Going back beyond 1899 it is found that as against the \$10,680,627 failures for 1901. the amount for October 1898 was \$14,126,754, for Ostober 1896 \$14,880,266 and for October 1895 \$15. 386.750. In contrast with these years of serious misfortune, current results, as the "Review" well says, appear highly favorable, especially when it is considered that the firms in business and the capital invested constantly increase and a commensurate rise in the number and amount of insolvencies might be expected if other things were equal. In the number of the failures, the showing is the same as in the matter of liabilities-that is, while the result is not as good as in the two years immediately preceding, when numbers were unusually small, it contrasts very favorably with the years of large misfortune in the past. Thus there were 864 failures in the month this rear, against 782 last year, and 610 in October 1899, but as against 1,254 in 1896 and 1,189 in 1895 and 1894, respectively.

Returns of railroad earnings continue to afford proof of the activity and prosperity of trade. One of the fruits of these large earnings is seen in the action of the management of the Pennsylvania Railroad Company this week in repeating the extra dividend paid in November last year. The company yesterday amounced the regular semi-annual payment of 2½ per cent, with an additional 1 per cent, the same as at the corresponding period in 1900. In other words, the shareholders get 6 per cent in cash this year, apart from the valuable subscription rights received during the twelve months. The amount of Pennsylvania Relired stock outstanding is over two hundred million dollars, so that the extra 1 per cent will require the payment by the company of an additional two million dollars. Earnings, however, are on a commensurate scale, and the declaration of the added 1 per cent doubtless means not only that current results we very satisfactory, but that in the opinion of the nangement the outlook for the near future is equally

it is quite a remarkable feature of the situation

the amounts of earnings keep steadily expanding, even where, by reason of the corn crop shortage, a fallingoff has been looked for. Quite a large number of returns have been received the present week for the month of September, and they are nearly all of the same tenor, that is, highly favorable; there being noteworthy improvement following no less striking improvement in previous years. Thus, the Atchison Topeka & Santa Fe has added \$622,675 to its gross and \$432,691 to its net, the Northern Pacific has added \$860,061 to gross and \$470,068 to net, the Canadian Pacific \$600,532 to gross and \$294,032 to net, the Milwaukee & St. Paul \$422,032 to gross and \$138,574 to net, the Union Pacific \$185,966 to gross and \$226,-171 to net and the Erie \$442,743 to gross and \$392,227 to net. These are a few of the most conspicuous instances of gain. They represent all classes of roads and practically all sections of the country. The many other roads not enumerated do not all reveal improvement in the same marked degree, but outside the South, where the cotton movement was backward, the results are nearly everywhere very gratifying.

With the exception of the Bank of England, which advanced its official rate of discount to 4 per cent, there was no change in official rates by the European banks this week. The open market rates at all the financial centres were, however, quite firm. With a view still further to retard the movement of gold from London to the Continent, the price of the metal in the bullion markets, which had declined at the end of last week, was advanced again on Tuesday to 77 shillings 112 pence for bars and 76 shillings 62 pence for American eagles. On Friday, however, the price of the latter was reduced to 77 shillings 64 pence. The Bank of Bengal at Calcutta reduced its official rate of discount on Thursday from 5 per cent to 4 per cent. On Tuesday the French Cabinet approved the bill authorizing a loan of 265,-000,000 francs in 3 per cent perpetual rentes to reimburse the Treasury for its outlay on account of the Chinese expedition and to pay indemnities to sufferers in connection therewith. On the issue of these rentes an equal amount in the public deposits fund will be canceled.

The feature of the statement of the New York Associated Banks last week was an increase, instead of the generally expected decrease, in cash by \$1,592,900. The loans were augmented \$9,650,500, while the deposits were increased \$9,382,000. The surplus reserve fell off \$752,600, to \$14,713,175. The Sub-Treasury has this week paid \$1,350,000, representing Yukon gold deposited at Pacific Coast points to the credit of the Bank of British North America, which gold was transferred hither through Assay Office checks. The above named bank has in transit from San Francisco \$1,000,000 more of these checks, representing Yukon gold, and the bank expects that \$500,000 Australian gold, consigned to that institution, will arrive at San Francisco early next week. It is noteworthy that the gold which has arrived and that which is expected as above stated, together amounting to \$2,850,000, will be about equal to that which was shipped hence to Paris on Thursday. Then Lazard Freres forwarded \$2,005,326 27 and Goldman, Sachs & Co. \$846,-259 73, making a total of \$2,851,586. When gold exports ceased in July last there had been shipped to at in the case of the rail carriers all over the country | Europe \$29,435,239 47. There was an export of \$200,-

in the

.

Engine France German State Spain State Sta

000 to Germany by the National City Bank in the week ending Ostober 19, and including that amount and this week's shipments, the exports since the beginning of the year have been \$32,486,825 47.

The payments for unmatured bonds at the New York Sub-Treasury until Friday, under the order of March 30, were \$112,000, making \$42,669,156 61 since April 2. These bonds were the remainder of those which were accepted by the Secretary of the Treasury when the order suspending bond purchases was issued on 6 stober 2. It was announced on Thursday that the Secretary would resume purchases of unmatured 3s, short 4s and 5s, and also of long 4s, reserving the right to discontinue purchases at any time. The following is the order as telegraphed from Washington:

"Reserving the right to discontinue without previous notice, the Treasury Department announces that it will, for the present, accept offerings of United States bonds, if tendered at the Treasury Department in Washington, or at the Sub-Treasury, New York, at prices to yield the Government interest, as follows: On the 8 per cent bonds, loan of 1908-1918, 5 per cent bonds, loan of 1904, and 4 per cent bonds, funded loan of 1907, to yield 1.726; and on the 4 per cent bonds, loan of 1925, to yield 1.936."

Bonds to the par value of \$1,282,000 were bought at the New York Sub-Treasury on Friday, under the above order, at prices computed by the Actuary of the Treasury Department on the basis established by the Secretary.

Money on call, representing bankers' balances, has loaned at the Stock Exchange this week at 5 per cent and at 31 per cent, averaging 32 per cent. On Monday loans were at 4 per cent and at 32 per cent, with the bulk of the business at 31 per cent. On Tuesday transactions were at 4 per cent and at 31 per cent, with the majority at 34 per cent. On Wednesday loans were at 4 per cent and at 33 per cent, with the bulk of the business at 32 per cent. On Thursday transactions were at 4 per cent and at 31 per cent, with the majority at 4 per cent. On Friday loans were at 5 per cent and at 32 per cent, with the bulk of the business at 4 per cent. Banks and trust companies have loaned at 31 per cent as the minimum. The tone of the time loan branch of the market is firmer, though rates remain unchanged at 41 per cent for all periods from sixty days to six months on good mixed, and at 5 per cent on all industrial collateral. The demand is only fair, while the offerings are moderate. The supply of commercial paper does not increase and the demand is chiefly from out-of-town buyers, the local banks and other institutions being practically out of the market. Rates are 41@42 per cent for sixty to ninety day endorsed bills receivable, 41@5 per cent for choice and 5@51 per cent for good four to six months single names.

The Bank of England minimum rate of discount was advanced on Thursday from 3 per cent, at which it had stood since June 13, to 4 per cent. The cable reports discounts of sixty to ninety-day bank bills in London 3\frac{1}{4}\omega 3\frac{1}{2} per cent. The open market rate at Paris is 2\frac{1}{4}\omega 3 per cent and at Berlin and Frankfort it is 3\omega 3\frac{1}{2} per cent. According to our special cable from London the Bank of England lost \pm 696,888 bullion during the week and held \pm 235,654,523 at the close of the week. Our correspondent further advises us that the loss was due to the export of \pm 749,000 (of which \pm 564,000 were to France, \pm 130,000 to Egypt, \pm 50,000

to Scandinavia and £5,000 to South America) and to £52,000 net received from the interior of Great Britain.

The striking feature in the foreign exchange market this week was the above-noted export of \$2,851,586 gold to Paris. The movement was in direct response to the disturbed situation at that centre caused by the recent collapse in the copper speculation, as stated in the CHRONICLE October 19. This disturbance led to more or less continuous selling of Paris exchange on London. causing such a decline in the rates for these bills as to draw gold from London to Paris, as was recorded last week. The concurrent drain of gold from London to Berlin tended to advance open market rates of discount at London, foreshadowing the rise in the Bank of England rate which was made this week. This monetary tension at London seemed to cause still more liberal selling of Paris exchange on Monday, when the rate fell to 25 francs 81 centimes. While gold could not be shipped hence to London as an exchange operation, our rates for sterling not permitting, a profitable shipment to Paris was possible because of the above-noted low rate for Paris exchange on London. The gold could be, and indeed was, sent to Parls and the shippers drew against the consignment with sterling bills on London, payment for which on their presentation has doubtless already been provided for with the proceeds of exchange at Paris on London, which exchange was presumably sold at the low rates for these bills which ruled on Monday. Through this shipment of gold there will probably be indirect relief to the London situation by partially, at least, satisfying the demands for gold at Paris. There is no assurance, however, that this relief will be more than temporary, for should discounts at London continue tense, further sales of Paris exchange will most likely be made, possibly causing such a decline therein as to result in a renewal of gold exports hence to Paris. effect upon our exchange market of the advance in discounts at London this week was observable in an increase in the demand for sight sterling to cover maturing exchange loans and for remittance, which inquiry was sufficient to absorb all offerings of bankers' sight bills, including those which were drawn against the shipments of gold. The market was quite active, though quotations were within a narrow range. Notwithstanding the fact that commercial bills against cotton were freely offered, the demand for those the delivery of which had not been previously contracted for was sufficient to promptly absorb them. Ninety-day bank bills were sold with some freedom for the purpose of renewing exchange loans, and these offerings, together with the higher discount rates in London, caused a slight decline in quotation for this class of bills. Francs were firm throughout the week in consequence of a good demand for remittance, but there appeared to be very little doing in other Continental exchange. The Assay Office paid \$909,576 36 for domestic bullion. Gold received st the Custom House during the week \$44,456.

Nominal rates for exchange are 4 84½@4 85 for sixty days and 4 87½@4 S8 for sight. Rates for actual business opened on Monday at a decline, compared with those if the close of last week, of one quarter of a cent for long to 4 83½@4 83½, while those for short advanced one eighth of a cent, to 4 86½@4 87, and those for cables one-quarter of a cent, to 4 87½@4 87½. The marks was easy for long and strong for short and cables.

On Tuesday long recovered one-quarter of a cent, to 4 831@4 84, while short and cables fell off one eighth of a cent, to 4 864@4 865 for the former, influenced by preparations for gold exports, and to 4 871@4 871 for the latter. On Wednesday long was a shade easier, st 4 831@4 835, while offerings of gold bills caused a fall in short of one-eighth of a cent, to 4 865@4 863; cables were unchanged. On Thursday long further declined one-eighth of a cent, to 4 838@4 834, while short was strong, in response to a demand for covering maturing exchange loans and also because of the advance in discounts in London, and quotations were 4 861@4 87; cables were higher at 4 871@4 875. The market was generally strong at the close, and it was quite firm on Friday, when there was an advance to the best rates of the week. The following shows daily posted rates for exchange by some of the leading drawers.

\*The division (between gold and silver) given in our table of coin and ballice in the Bank of Germany and the Bank of Belgium is made from the best estimate we are able to obtain; in neither case is it dained to be accurate, as those banks make no distinction in their weekly returns, merely reporting the total gold and silver, but we believe the division we make is a close approximation.

#### COPPER AND EUROPEAN CONSUMPTION.

A good deal of the market's attention during the present season has been absorbed in the questions, what was the real position of the visible supply of copper and whether the price could or could not be maintained at its present high level. The questions attracted interest chiefly because of their bearing on the finances of certain companies whose shares have been widely dealt in on the speculative and investment markets. We do not propose in this article to discuss these two questions, for the reason that the statistics on which a trustworthy opinion could be based are not accessible. But the situation of the copper trade in general is a matter which can be discussed with some hope of reaching positive conclusions, and it is a very interesting situation, not only from its bearing on our own foreign trade and on the position of European industry, but from its intimate connection with the curious state of affairs on the Paris

The returns of the Bureau of Statistics on this country's foreign trade for the first nine months of 1901 give a pretty plain view of the real situation. During those same nine months last year the United States exported, by the Bureau of Statistics figures, 272,526,368 pounds of copper bars and ingots. The Bureau's record for the same period this year shows exports of only 147,040,875 pounds. This is a decrease of very nearly 50 per cent. More striking still is the fact that the nine months' record for the present year is not only smaller than that of the three active preceding years, but is the lowest total reached for the period in any year since 1895. Furthermore, the decrease in exports, as compared with 1900, is general to all Europe. To the United Kingdom this country shipped 23,600,000 pounds less; to France, 26,300,000 pounds less; to Germany, 26,200,000 pounds less; to the rest of Europe, 49,300,000 pounds less. In other words, all of the foreign consuming markets of the copper trade have contracted simultaneously, and very violently. Nor had the process of contraction slackened as the nine months drew to a close. In September alone France appears to have bought from us rather liberally, but exports to all other European markets showed up less by fully 50 per cent than in 1900.

In order to understand what this downward movement really means, it is necessary to review the course of copper exports in the years preceding. Taking the calendar year 1893 as fairly typical of the movement of the earlier period, it will be found that the United States then exported 138,984,128 pounds of copper, valued at \$14,213,378. Four years later, in 1897, the quantity exported had exactly doubled, reaching 277,255,742 pounds for the year. It rose to 291,955,905 pounds in 1898; was reduced by some forty-five million pounds in 1899; but in 1900 suddenly expanded again with great rapidity, reaching the huge total of 338,121,071 pounds, worth on the export market \$55,291,137. This shipment was in quantity nearly two and a-half times as large as the exports of 1893, and in value nearly four times as great.

Every important State of Enrope contributed to this immensely enlarged demand. Last year's import of copper from the United States, as compared with 1893, increased most largely in Germany, which bought nearly four times as much in 1900 as it did

in the earlier period. But, as against the increase of nearly 50,000,000 pounds in Germany's yearly imports, France took not quite 40,000,000 pounds more than it did seven years before and Great Britain 21,000,000 pounds more, while the rest of Europe increased its purchases by 87,000,000 pounds.

It is worth noticing that the increase in annual exports to the rest of the outside world increased hardly a million pounds over 1893. The immense expansion in consumption during the period under review occurred in Europe and the United States. What the increase in this country was may be judged by the following table of production in and export from the United States, figures of output being taken from the Government Geological Survey's returns and of export from those of the Bureau of Statistics.

COPPER PRODUCTION AND EXPORT, IN POUNDS.

| COPPER PRODUCTION  | AND EXPO  | ORT, IN POUND | 8.          |
|--------------------|-----------|---------------|-------------|
|                    | 1900.     | 1899.         | 1893.       |
| U. S. production60 | 6,117,166 | 568,666,921   | 339,785,972 |
| U. S. exports33    |           |               |             |
| Balance26          | 7.996,095 | 321,840,590   | 200,801,844 |

That is to say, the increase in annual American consumption has been much greater than that in any other nation of the world. In fact the above figures by no means tell the whole story, as we have become a large importer of copper during the last few years. Making this allowance, the showing of actual copper consumption is as follows.

COPPER RETAINED AND IMPORTED, IN POUNDS.

| Balance retained from hor | 1900.       | 1899.       | 1893.       |
|---------------------------|-------------|-------------|-------------|
| production                |             | 321,840,590 | 200,801,844 |
| Imports                   | 68,797,591  | 71,922,340  | 5,536,690   |
| Total consumption         | 336,793,686 | 393,762,980 | 206,338,534 |

Here is an apparent increase of no less than 186,-000,000 pounds between 1893 and 1899.

There has never been any mystery as to the cause of this extraordinary movement. In this country and in the progressive States of Europe, development of enterprises based on electrical equipment has gone forward at an amazing rate. Construction of electric railways in particular has advanced with such rapidity that the manufacturers could hardly keep pace with it. What was witnessed in the successive "booms" of the seventies and eighties, when extension or requipment of steam railway lines was the centre toward which the promoter's energies converged, has been witnessed again in the recent movement of prosperity; but with this difference, that copper largely occupied the place which was filled by iron in those former decades.

To people familar, as most investors are, with the immense expansion of the American electric railway industry, there is no need of explaining either the manner in which these immensely-increased supplies of copper were absorbed or the financial processes whereby the requisite capital was obtained. The second of these two questions is, however, a matter of vital importance in the European side of the problem. As we have seen, the total purchase of copper from us by Europe during the first nine months of 1901 has suddenly fallen to a lower figure than that of any other year since 1895. This has not happened because Europe's possibilities of electrical development have all been filled, or because new enterprises on the lines of those undertaken in the last few years would not be profitable. The problem which settled the question of the continuance of last year's immense absorption of electrical material was the problem of raising capital for that purpose. Primarily it is the disorder on the money markets-first at London, then at Berlin, and finally at Paris—which has contracted the source of capital on which was based the remarkable movement of last year. Of course the recent material advance in the price of copper would likewise, in the less venturesome state of the money market, help to discourage enterprises calling for a further enlargement of its use.

It would naturally follow, from this conclusion, that the immediate future of our copper export trade must rest on the course of the European markets. So long as outside investors at those points withhold their funds, precisely so long must the extension of European electric enterprise be deferred, and Europe's consumption of copper proportionately reduced.

How much the question of the American price for copper may have to do with the slackening foreign purchases is a question of great interest. Copper is selling at New York to day 4 or 5 cents per pound above its price of two years ago and fully 7 cents per pound above that of 1895. The domestic copper trade appears to believe that the present price is to be maintained, even if production has to be heavily restricted. It is true that Europe's visible supplies of copper are very low, and that there are important foreign requirements which must be filled in any case. But with the markets of Europe in their present posttion, and with the possibility of sustaining the price of copper actively canvassed in those markets, it is certainly not reasonable to expect any immediate increase in Europe's purchases, or the closing now of contracts for delivery which the foreign buyer is able to defer.

# THE PROPOSED NEW GERMAN CUSTOMS TARIFF-THE TARIFF QUESTION IN AUSTRALIA\*.

MANCHESTER, October 19, 1901.

Increasing attention is being paid in this country to the proposed new Customs tariff of Germany, which as yet is but a scheme, although it has been adopted by the Imperial Government. An English translation of the greater part of it—that affecting British exports to Germany—was published by the Commercial Department of the Board of Trade some weeks ago. This is now under the consideration of a committee of the department and copies of it have been distributed to the leading chambers of commerce in the United Kingdom, with a request for reports upon such portions of it as are of particular interest to the trade of the districts in which they are severally situated.

The translation gives in parallel columns the existing and the proposed rates of import duty. It embraces 812 of the 925 categories of the new tariff, the rest referring chiefly to agricultural products and other commodities, the German imports of which are not of immediate concern to British producers and merchants. It is of course well understood that, notwithstanding the enormous amount of the commercial exchanges between Great Britain and Germany, the Government of this country can exercise no inflaence in the way of diplomatic negotiation in the final adjustment of the tariff. The settled free trade policy of the British people renders it unnecessary for their administration to enter into any kind of bargaining for reciprocity. There are a few people who, on such occasions as this, cannot help regretting, in the language of an eminent English statesman, spoken many years ago, that "we have thrown away the keys by

<sup>\*</sup> Communicated by our Special Correspondent at Manchester.

which we might have opened the closed doors of some foreign countries." But it is not forgotten that apart from the other recommendations of this policy, it always assures to British trade the "most-favoredpation treatment" without hesitation. But although not so directly interested in the tariff struggle now just beginning to wax warm in Germany as are the near neighbors of that country, the British Government and the commercial authorities are studying the changes proposed in the new scheme with a view to forming an intelligent opinion as to its probable effeet, if it should be adopted, upon the export trade from the United Kingdom to the Fatherland.

But will it be adopted? The changes of duty constitute altogether a great step forward in the path of Protection. In a very few cases reductions are prorided for, and some remain the same as in the existing tariff, but on an overwhelmingly large proportion of the articles enumerated, both agricultural and manufactured, the duties are very greatly raised. Good authorities are of opinion that if the final decision were in the hands of the existing Parliament, the scheme would be passed with very little alteration. But no change can be made in the present conventional tariff, which applies to all but an insignificant portion of the imports, until the end of 1903, when the treaties now running between Germany and other countries expire. Meanwhile a new Reichstag must be elected, which will begin its sittings before the middle of that year, and it is exceedingly probable that the final word on this subject will be said by that as yet unelected body. In the meantime many things will happen bearing upon the present scheme, and it is these as yet unknown contingencies which give the

question its most impressive interest.

In the first place, there is the question whether or not Russia, Austria-Hungary and Italy, not to speak of the United States, whose food products find a large market in Germany, will consent to enter into new treaties based upon an enormous increase in the German duties on agricultural commodities. France may be left out of consideration because the Treaty of Frankfort provides in perpetuity for mutual concession of most-favored-nation treatment reciprocally between that country and Germany. Then, secondly, there is the internal opposition which this part of the proposed tariff is exciting, and will excite still more, amongst the wage-carners and the manufacturing population generally. The German s are a patient and law-abiding people, but there cannot be the slightest doubt that the great increase in the cost of the necessaries of life which would be the result of adopting the schedules of the proposed tariff relating to food products, or anything like them, would substantially swell the ranks of the Social Democrats, and would be stoutly opposed by the middle classes. Discontent is already manifest amongst the workpeople of the manufacturing districts, who are suffering severely from want of employment or reduced wages, the consequence of the financial and commercial troubles and failures of banks which have ensued during the last few months. With its customary promptitude in such matters, the German authorities have lodged numerous bank managers and directors in jail, and German detectives are now in Manchester in search of others who have escaped. This week a meeting of the working colliers of Western Germany has been held to discuss their unfortunate circumstances, and a similar assembly of

there is much discontent amongst the cotton mill operatives of Southern Germany, who are demanding an advance of 20 per cent in wages, threatening a general strike if their demand is not granted. This demand cannot be the result of increased prosperity in the German cotton industry, which is known to be in an unfavorable condition. It must proceed, therefore, from the insufficiency of present earnings to cover the cost of decent living.

These symptoms are a striking comment upon the present attempt to raise the Customs duties of Germany, especially those upon food products. If already the economic state of the urban masses is thus straitened by a spell of commercial depression, such as is the occasional lot of all great industrial communities, what is it likely to be if the cost of maintenance is further raised by a higher tariff upon imported commodities? Again, it must not be supposed that the proprietors of manufacturing establishments in Germany are by any means unanimous in approving of the additional, almost all-round, protection provided for in the proposed tariff. This document was prepared by a special committee which sat for many months in Berlin. Before its work was begun invitations were sent to representative bodies in each industry inquiring what changes should, in their opinion, be made in those parts of the tariff affecting their particular businesses. Naturally they were in favor of higher duties on imported articles competing with their own productions. But many of these articles are raw materials or accessories of other industries, and those who use them are averse to any change in the duties which will increase the cost of production of their own manufactures. Thus there has emerged a conflict of interests which it will be very difficult to allay. It is impossible to form a definite opinion as to the precise bearing of these internal divisions upon the ultimate settlement of the tariff. Trade generally in Germany may improve greatly before that point is reached, and some at least of the grounds of opposition to it may be removed, but it is hard to imagine that the proposal to raise greatly the cost of living will be contentedly accepted by the masses of the people.

The whole movement for increased pretection springs from the Agrarian party, the landed gentry. They are politically the backbone and support of the Imperial system, and the Government has been compelled, probably against its better judgment, to give way to their demand for imposing stronger barriers to the importation of competing foreign agricultural products. Then came the movement for increased protection to German manufactures and the framing of the new tariff scheme. The situation, in so far as the Agrarians are concerned, closely resembles that existing in the United Kingdom in the years immediately following the formation of the Anti-Corn-Law League, founded in Manchester in 1839. Sir Robert Peel was the Count von Bulow of those days and the British land owners and farmers were the Agrarian Party. But Sir Robert was in time convinced by the "unadorned eloquence" of Richard Cobden and by the distresses of the times that his powerful supporters were wrong, and he had the courage to turn round to them and tell them that he had become a free trader and that the Corn Laws must go. They had pleaded "agricultural distress" as the ground of their persistence, just as the Agrarians are doing now, and Sir iron-workers has met in Berlin. It is stated, too, that Robert fought for them as long as he could; but he

through the residence of the residence o

had to give in at last. Will Count von Bulow follow his example? There are some reasons for thinking that he will.

The "Exposé des Motifs," by which the publication of the German commercial treaties of 1891 with the neighboring European countries was accompanied, set forth that Germany was no longer a characteristically agricultural country; that its manufacturing industry had outstripped the requirements of the home market, and that it was necessary to disarm the growing protectionism of other nations by entering into treaties on the basis of mutual lowering of tariffs. The treaties were accordingly made, their term being twelve years. They expire, consequently, on December 31st 1903, and it is in view of their renewal that the Agrarian agitation for higher duties on agricultural products has been started and vehemently pressed on. The ideas expressed in the "Exposé" were powerfully supported by a speech of Count von Caprivi, then Imperial Chancellor, delivered in the Reichstag on December 10th 1891. In the course of it he said: "What we now have to do is to find out the best means of ensuring to this country the profitable pursuit of agriculture, the prosperity of (manufacturing) industry, and sufficient work for the laboring population. We would not have attained this by the former (high protectionist) method. From the tendency to commercial seclusion which is known to prevail in Russia, America and France, there would result-if we also persevered in the same policy, or were to go still further in it-a war of all against all; each European country would attempt to close its frontiers to every other. This can be done; but even if we were able to shut ourselves off against others, we would not be able in the long run to lead an independent and self-sufficient existence. We are inevitably dependent for our welfare upon the exchange of products and goods with foreign States in consequence of the natural laws which govern our geographical position, our climate and our soil. If we insisted upon persevering in our former course, the struggle for existence would become so intense that Germany would lose one industry after another. We have not made a new departure. When in the year 1874 204 members of this House, with Vanbuler at their head, gave the first impulse to 'the reinforcement of national labor,' as it was then expressed, they said in one of their memoris's: 'The difficult questions of German commercial policy must not be solved according to hasty cries of free trade and protection only; it should rather be attempted to arrive at a compromise in the real and inevitable conflict of interests with caution, knowledge and patriotism."

It is almost impossible to believe that the German Government, which is almost punctilious in following well-established precedent, can ultimately abandon the policy laid down in the "Exposé des Motifs" and in the memorable and carefully prepared speech just referred to. At this stage of the question it is bound to be the advocate of its most powerful supporter, as Sir Robert Peel was from 1840 to 1845. But circumstances are often more powerful than men, and it ought not to be any surprise if Count von Bulow should, before very long, declare that he is unable to carry out the policy of the new tariff. In that case, will the new schedule as finally settled be more liberal than the schedules of the present one? Probably not, according to present appearances. It must be observed, however, that there is a good deal of unrest in Ger-

many, particularly upon this question of foreign commercial policy, and it will not seem very strange to observant people if the new tariff to be put into force on January 1st 1904 should be easier with regard to imports than the present one.

The Hamburg Chamber of Commerce has issued an elaborate criticism of the proposed tariff, in the course of which it is shown that if it should be adopted it will go far to cripple many German industries and to lease greatly the foreign commerce of the Empire. Unfortunately the Hamburg Chamber, important as it is in the wealth, intelligence and knowledge of its member, and of the constituency it represents, has companded the influence at Berlin. It is regarded as a free trade institution, and whatever it may say is received with suspicion by those who are politically powerful.

The particulars of the tariff scheme of the Australian Commonwealth have not yet been received. but it is known that the principle upon which it is founded is that of moderate or slight protection to Australian industries. It meets with much opposition, particularly from the representatives of New South Wales-a free trade State-which under its hitherto separate colonial administration has never. except for a brief period, and only then very slightly, yielded to protectionist sentiment. The conflict in the Federal Parliament is still going on, and we are quite unable at present to forecast the issue. Nor do Australian business men now in England venture to forecast the final issue. Probably there will be a compromise between the free traders of New South Wales and the protectionists of Victoria which will result in some modification in details of the proposed tariff. The main question, of course, is the amount of revenue to be derived from Customs revenue, and it is almost certain that the duties will ultimately be settled with an eye to this object. New Zealand is not included in the Commonwealth, and there is some friction as to the manner in which the tariff affecting the products of that colony will bear upon its trade with the mainland. The area of Australia is 2,972,906 square miles and its population 3,777,212. The area of New Zealand is 104,471 square miles, and its population 773,439. It was by the desire of the people of New Zealand that they were excluded from the federated States of Australia, but they may later on throw in their lot with the other States. It is hoped that the tariff will be so framed as to invite rather than to compel their adhesion. The new arrange ment will not include any preferential treatment of British goods, and there is no visible evidence in the mother country of a desire that the Canadian erample in this respect should be followed.

#### MINNEAPOLIS & ST. LOUIS.

The Minneapolis & St. Louis is one of the smaller Western roads which is enjoying noteworthy preperlty. Its lines are eligibly located in a good section of country. With its northern terminus in the twin cities, what may be called the main stem runs south to within a short distance of Des Moines; another line runs almost due west to Watertown, Dekota (being the Wisconsin Minnesota & Pacific, sequired from the Rock Island in 1899), and from this line there is a fork running down to Storm Lake, Is. The whole connects with or intersects a large number of other roads. The little system, which even after

the recent additions comprises no more than 642 niles of road, has been admirably managed. During the last two years there have been frequent rumors that the road was desired by one of the larger systems, and though these rumors have been repeatedly denied, they are revived every now and then. It is easy to see that by reason of its location and strategic position the property might form a useful adjunct to more than one important system, leaving out of consideration altogether the circumstance that, being independently profitable, it would be a desirable investment on its merits.

The position of the road has undoubtedly been strengthened by the fact that the Iowa Central is now controlled by the same interests as the Minneapolis & St. Louis itself, though remaining a separate property. The Minneapolis & St. Louis has greatly added to its mileage within recent years. We have already referred to the acquisition of the Wisconsin Minnesots & Pacific, and further evidence is furnished by the statement in the report that on August 19 1900 the gap of 64 miles needed to complete the Southwestern extension from Estherville to Storm Lake was closed, and that the average number of miles of road operated during the twelve months was 633 miles, an increase of 119 miles or 20 per cent over the twelve months preceding. The further addition to revenues during the late year, on top of the increases of the years preceding, must of course be ascribed in good part to the expansion in mileage, for the road is located in the heart of the spring-wheat country, and therefore could not have been unaffected by the shortage of the spring-wheat yield in 1900. The road's flour tonnage fell off 14 per cent as compared with the year previous, but on the other hand the aggregate agricultural tonnage (including flour) increased 16 per cent, being 849,932 tons, against 732,721 tons. The tonnage in forest products rose from 314,911 to 378,491 tons, that in the products of animals from 49,241 to 55,331 tons, and though the mineral traffic and the manufacturing tonnage fell off somewhat, the movement of merchandise and miscellaneous articles increased, so that the whole freight tonnage at 1,766,-287 tons was fully 10 per cent larger than in the year preceding. In the passenger department also there was considerable improvement. Altogether the remark in the report that the section of the Northwest served by the lines of the road shared in the general prosperity prevailing throughout the country is fully

The further addition to gross revenues in the year under review was \$412,193, or over 14 per cent, and the addition to net earnings \$164,017, or about 13 per cent. The successive increases which have occurred in recent years will appear when we say that at \$3,275,-503 the gross earnings for 1901 compare with \$2,863,-310 for 1900, with \$2,500,004 for 1899, with \$2,246,580 for 1898, and with \$2,006,505 for 1897. The net earnings at \$1,426,819 compare with \$1,262,802 in 1900, with \$1,061,999 in 1899, with \$950,959 in 1898 and with \$874,788 in 1897.

Fixed charges are now heavier than they were a few cars ago. A large amount of new mileage, as we have seen, has been added, and the company in 1899 also paid off its \$2,500,000 of 1st preferred stock through the issue of the refunding mortgage bonds. The retirement of the 1st preferred stock has left only two classes of stock, namely; \$4,000,000 of preand \$6,000,000 of common stock. The preferred stock has been getting the full 5 per cent dividend for two years, and the common stock is now receiving 4 per cent per annum. On the operations of the late year the company had available for dividends the sum of \$553,762. The dividends at 5 per cent on the preferred and 4 per cent on the common took only \$440,-000, leaving a surplus balance in the sum of \$113,762.

These satisfactory results are in great measure due to the high operating efficiency which has been attained in the management of the property. For a small road the showing is quite remarkable in this respect. We directed attention a year ago to the large percentage of loaded cars shown by the car movement and the high average train load disclosed, and the same features are further accentuated the present time. The proportion of loaded car mileage to total mileage in the late year was 84.27 per cent, leaving only 15.73 per cent of empty-car mileage. The train load was further increased over 37 tons, bringing the average up to 288 tons. In 1896 the paying train load was only 173, showing what has been accomplished in that direction during the last five years. These figures relate to revenue freight only. Including freight carried for the company's own use, the train load averaged 321 tons. The revenue train load of the Milwaukee & St. Paul the same year was 236 tons, and that of the Chicago & North Western for the twelve months ending May 31 1901 was 232 tons, as against the Minneapolis & St. Louis's average of 288 tons. The M. & St. L. realizes somewhat betterrates than either of these roads, and this advantage combined with the other enables it to show train earnings per mile run at the remarkable figure of \$3 30. The trains of the North West earned only \$1 98 per mile run and those of the Milwaukee & St. Paul \$2 04.

#### ITEMS ABOUT BANKS, BANKERS AND TRUST CO'S.

-The auction sales of bank stocks this week aggregate 240 shares. The prices realized were all somewhat in advance of recent quotations, the greatest gain showing in the stock of the Bank of the State of New York, which sold at 2571/4 as against 240 in September. The transactions in trust company stocks reach a total of 50 shares. No sales of either class were made at the Stock Exchange. In the "curb" market a few small lots of National Bank of Commerce stock were sold at 885 to 387 and of Atlantic Trust Co. stock at 292,

| these being the only sales repor             | tou.                                                                   |              |                                           |                          |

- At the convention of the Illinois Bankers' Association this week at Quincy, Homer W. McCoy was duly chosen President for the ensuing year. Mr. McCoy, though a young man, is one of the best known and most progressive bankers of the West. When in 1897 the Bank of Commerce and the Merchants' National Bank of Peoria were consolidated, Mr. McCoy was elected one of the Vice-Presidents of the combined institution and ably filled that position until he accepted the [cashiership and management of the Commercial National of Peoria in 1899, which was signalized by the rapid growth of that bank in all its departments.

In May last Mr. McCoy formed a partnership with W. J. MacDonald, of Chicago, under the firm name of MacDonald, McCoy & Co., which firm is now very prominent in that city as dealers in municipal and corporation bonds. Mr. McCoy resigned his position as Cashier of the Peoria Bank, but was at once elected Vice-President because of the value of his advisory services. At the American Bankers' Convention in ferred stock (formerly known as 2d preferred stock) Milwaukee last month, Péorla was frequently heard spoken o! as "Homer McCoy's town." It seems that not only Peoria but the State of Illinois as well is his by popular vote of the bankers in convention assembled.

-It is announced that the Ninth National Bank of this city has passed under control of interests closely identified with the Hanover National Bank through the purchase of stock by those interests. At a meeting of the directors of the bank on Tuesday William A. Halls Jr., Vice-President of the Hanover, was elected a director of the Ninth, and Nelson A. Reynolds, who has been the city manager of the Hanover, was appointed Cashier in place of Albion E. Chapman, who voluntarily resigned that position, accepting that of Assistant Cashier, to which he was immediately appointed. The above-noted change in the control of the Ninth National was quite recently determined upon, and it has been carried into effect since Friday of last week, when the initial movement was made. The change of control cannot, it would seem, be otherwise than beneficial to the interests, not only of the Ninth and of the Hanover, but to those of the banking in. stitutions of the city as a whole. The Ninth National occupies an excellent location (407 Broadway) for mercantile business, and under the management of the Hanover's interest its patronage will doubtless largely increase. The bank was organized in 1864. In 1900 John K. Cilley, who was then President, sold nearly the whole of his holdings of stock, about 3,600 shares, to Charles H Imhoff, the Vice President, and Alvah Trowbridge succeeded to the presidency and now holds that position. The bank has a capital of \$750,000, and surplus and undivided profits of \$71,600. It was reported during the week that the H mover had secured a large interest in the Mechanics' & Traders' Bank. This report was officially denied.

-Edwin Gould was on Wednesday elected President of the reorganized Seventh National Bank. Edward R. Thomas William H. Taylor were chosen Vice-Presidents, R. W. Jones Jr., Vice-President and Cashier, and Sullivan & Cromwell general counsel. The bank is still operated under the receivership and it will continue to so operated until the receiver can be formally discharged by order of the Court, which will probably be some time next week. It is proposed that those of the depositors who have had funds in the bank since the failure shall be allowed interest at the rate of 8 per cent per annum during the period of suspension.

-The merger of the Shoe & Leather National in the National Bank of Redemption, Boston, particulars regarding which were given in this column last Saturday, was consented to this week by ninety per cent of the stockholders of the former, and the actual consolidation took place on Thursday. All checks outstanding after that date on the ab sorbed bank will be paid by the National Bank of Redemption.

At a recent meeting of the directors of the Maryland Trust Co., Baltimore, Mr. Alexander Brown, who resigned from the Board last spring, priorito going abroad, was re-elected as a director, and Mr. L. F. Loree, President of the Bultimore & Ohio RR., was also elected to fill a vacancy in the Board.

-A very fiattering report was made at the recent annual meeting of the Bank of California at San Francisco. The net earnings of the bank for the twelve months to September 30 1901 are stated to have been \$741,568. Out of this taxes were paid and also dividends aggregating 16 per cent, and even then a surplus of \$347,791 remained, equal to 17 per cent more on the stock. The total amount to the credit of profit and loss is now \$2,851,860. The capital is \$2,000,000, and there is a reserve fund of \$1,000,000 independent of the \$2,851,860 undivided profits. The officials of the bank are: President, William Alvord; Vice-President, Charles R. Bishop; Secretary, Allen M. Clay; Cashier, Thomas Brown; Assistant Cashiers, S. H. Daniels and I. F. Moulton.

-The National Bank of Commerce of Omaha, Neb. (originally a private institution, then a State bank, and in 1890 chartered as a national bank), has turned over \$220,000 in each to the Omaha National Bank to pay the depositors of the Commerce, and will close up its affairs. The reason given by President J. H. Evans for the retirement of the bank, which is entirely solvent, is that \$150,000 of the institution's capital of \$200,000 is in real estate, allowing a margin insufficient to compete with the large banks of Omaha.

-Mr. William Wallace has been promoted from the pos of Cashier of the Omaha National Bank, of Omaha, Neb., to that of Vice President. Mr. Charles B. Anderson, of Creb. Neb., is the new Cashier.

-Robert M. Orr has tendered his resignation as Vice President of the Corn Exchange National Bank of Chica A recent sale of the stock of this bank was made at 396, being a record price.

-Plans for the reopening of the First National Bank of Austin, Texas, are now under way, but pending the necessary authorization from Washington no date has as yet been fixed. The bank was obliged to close three months ago, but it is stated that when arrangements for the reorganization are completed the State will be paid dollar for dollar. Mr. John H. Kirby is mentioned as the new head of the institution and former President W. B. Wortham as Vice President.

-It has been decided by the Davenport National Bank of Davenport, Iowa, to go into voluntary liquidation. While the bank is solvent, it is said that the business done by the institution was not sufficient to warrant its continuance in the field in competition with larger concerns. Its assets will be purchased by the Union Savings Bank, the President of which, Mr. Henry Egbert, was also at the head of the Davenport National.

-Mr. F. J. Kinney has been appointed National Bank Eraminer in the district comprising Louisiana, Mississippi and Arkansas, with headquarters at New Orleans. In this, answ district, Mr. Kinney will have about 60 banks under his supervision.

-Among the institutions to whose growth we have called attention during the last six months is the Third National Bank of Atlanta, Ga., which has found it necessary to secure better facilities for carrying on its business. The new offices in the Empire Building, which were opened on Monday, are not only commodious but have been furnished in a manner befitting an institution of its size. Mr. Frank Hawkins is the President.

-The corporate existence of the People's National Bank of Norristown, Pa., organized in 1881, has been extended until 1921. The bank has a capital of \$150,000 and is managed by Mr. S. K. Anders, President; John J. Hughes, Vice President, and Lewis Styer, Cashier.

-Mr. John A. Kling was added to the list of directors at the recent meeting of the stockholders of the Produce Erchange Banking Company of Cleveland, at which the old board was re-elected. At a subsequent meeting of the latter no change was made in the officials of the institution, who were re-elected to their respective positions.

-Mr. Edwin L. Lobdell, of Chicago, has admitted into partnership with him Messrs. Wm. Vincent Baker, Edward D. Winslow and Harry B. Richardson, the new firm to begin November 1, and to continue as bankers and brokers in stocks and bonds in suite 430-440, The Rookery, Chicago. Mr. Baker has served a long and successful apprenticeship in the brokerage business, first with A. O. Slaughter & Co. from June 1890 till August 1897, and thenceforward until September last with Edward L. Brewster & Co., two of the strongest houses in the West.

Mr. Winslow is an old and well-known Chicagoan, who for four years past has been Consul General of the United States to Norway and Sweden, with residence at Stockholm. President McKinley desired to re-appoint him, but he preferred to return home and engage in active business. He will have charge of the Board of Trade business of the new firm.

Mr. Richardson also was with A. O. Slaughter & Co. for several years, but has been Mr. Lobdell's chief clerk for the past two years, since his separation from the firm of Lobdell, Farwell & Co.

-Articles of incorporation were last week filed by the Lincoln Trust Company, which will locate in Jersey City. The capital and surplus have been fixed at \$100,000 each, the subscriber paying besides the \$100 for each share an extra \$100 for the surplus fund. Mr. Harry Louderbough has been made President of the new company and Mr. Andrew Spotts, Vice-President and General Manager.

Mr. Edwin M. Farrier, Assistant Paying Teller of the Hudson County National Bank, Jersey City, is named as the probable Secretary and Treasurer of the new organization

It is expected that the company will be ready for business by February 1.

-Hoboken, N. J., is also to have another trust company, the incorporation being announced of the Home Trust Company, with offices at 51 Newark Street, Hoboken. The orpany, state the institution are: Robert A. Franks, West Orange; Adrian H. Joline, Bernardsville; Albert Rathbone, New York; George H. Young, Nutley; Arthur H. Van Brunt New York, and Adrian H. Larkin, Nutley.

-The late M. G. Emery, President of the Second National Bank of Washington, D. C., has been succeeded by Mr. W. V.

-Mr. H. A. Forman, one of the former Vice-Presidents of the Fourth National Bank of St. Louis, Mo., has been elected President of the bank. The new Vice-Presidents are Frank A Ruf and J. D. Goldman.

-At their meeting on Wednesday the stockholders of the Mercantile Trust Company of Boston approved the increase in capital from \$250,000 to \$500,000. As stated last week, the surplus will profit to the amount of \$125,000 by the sale of the new shares. The increased capital and surplus will go into effect on January 1.

-Temporary organization has been effected of a club composed of bank clerks of St. Paul, Minn., the object of which will be to discuss topics pertinent to banking. Mr. C. S. Diether, of the First National Bank, has been elected Secretay, and W. B. Clow, of the St. Paul National, Chairman.

-The receiver of the Pynchon National Bank of Springfield, Mass., which closed its doors by order of the Comptroller of the Currency in the latter part of June, on Tuesday began the payment of a 20 per cent dividend to the depositors and other creditors. On approved claims of \$1,085,000 the dividend amounts to \$217,000. It is expected that another and larger dividend will be paid in a short time. It is rumored that a syndicate has offered to liquidate the accounts of the bink, paying depositors in full.

-The Colorado Springs Trust Company has been organited as successor to the Colorado Springs Bank of Colorado Springs, and as such began business last Monday. The bank mened last May, succeeding the banking department of the firm of Messrs. William P. Bonbright & Co. The trust company has a full-paid capital of \$250,000. Its officers are: President, H. G. Lunt. Vice-Presidents, John G. Shields and D. V. Donaldson; Treasurer and Assistant Secretary, Irving W. Bonbright, and Secretary and Assistant Treasurer, Fredstick W. Stehr.

-The appointment is announced of Mr. Josiah H. Gifford s Cashier of the Merchants' National Bank of Salem, Mass., Mr. Albert P. Goodhue as Assistant Cashier and Frank Ashby Brooks as Teller. As previously mentioned herein, Mr. H. M. Batchelder, former Cashier, was recently elected President of the bank.

-The annual meeting of the Oklahoma Bankers' Association will be held at Guthrie on November 25 and 26. Mr. W. L Moyer, Vice-President of the Western National Bank of New York and Mr. Breckinridge Jones, Vice-President of the Mississippi Valley Trust Company of St. Louis, will, it is sid, address the bankers.

-A lease has been signed by the City Bank of Hartford for the premises on the southwest corner of Main and Asylum streets for a term of fifteen years beginning May 1, 1902. The lease of the present occupants will expire on April 1, and during the month intervening the bank will have the offices minishiy fitted and furnished. In its new quarters the City Bank will be well equipped to handle the large patronage it cijoys, Mr. Charles T. Welles is President; Charles B. Whiting, Vice-President, and Edward D. Redfield, Cashier.

-Masera Kean, Van Cortlandt & Co. have purchased a lot of land 57 by 71 feet on the north side of Pine Street, eing numbers 28, 30 and 33. The land adjoins the plot resally purchased by Messrs. Speyer & Co. The City Real Propthy lavesting Co. are jointly interested with Kean, Van Cortdi & Co. in the purchase of the site and in the new retrestory building, the work on which will probably bemari May. The bankers will occupy the first floor and ment. The upper stories will be especially desirable for dies, a they will have light and air permanently secured

Speyer & Co., is to be a low structure, having only three stories, while the rear, on Cedar Street, has been acquired by the Mutual Life Insurance, for the purpose of protecting the light of its building on the opposite side of the street.

-The Bank of Washington Heights, a State institution with a capital and surplus of \$100,000 each, the organization of which was recently announced in this department, began business this week at the corner of Amsterdam Avenue and One Hundred and Fifty-fifth Street.

The United National Bank, capital \$1,000,000 and paidin surplus of \$200,000, notice of the organization of which was recently printed in this department, will open for business November 11 at the corner of Broadway and Forty-second Street. The President is Henry W. Gennerich, the Vice-President Charles F. Holm, the Second Vice-President Henry von Minden, the Cashler W. W. Warner and the Assistant Cashier Henry C. Strahmann.

-The Council of Administration of the New York State Bankers' Association met at Buffalo on Monday, A. D. Bissell, President of the Association, presiding. Questions of taxation, both State and national, were considered, and it was decided to petition Congress for the removal of the war revenue tax on banks. The next convention of the State Association will be held in this city in October 1902.

News was received on Tuesday that Frank Tilford had recently resigned as director of the National Bank of New Amsterdam. Mr. Tilford was formerly President of this bank, resigning January 10, when he was succeeded by R. R. Moore, the Vice President. Charles W. Morse, who had secured a controlling interest in the stock, was then elected Vice-President.

#### Monetarn Commercial English News

[From our own correspondent.]

LONDON, Saturday, October 19, 1901.

It is announced in the papers that the Marquis of Salisbury returns to town the middle of next week, and it is hoped that as soon as the Prime Minister is back some serious efforts will be made on the part of the Government to take energetic measures to bring the war to a rapid conclusion. You will have seen by the English papers going out by last week's and this week's mail that a vigorous campaign has been going on in the press here against the dilatory sleepy measures of the Government. In this matter the press is doing no more than its duty, and it is simply re-echoing in a more or less literary form what ordinary people are saying in colloquial language in the clubs and in general society, and wherever men assemble together. There are signs that the Government itself is awakening to the fact that although there is no regular opposition capable of taking office, nevertheless the country is very dissatisfied with the general apathy displayed by the Administration, and that when Parliament meets in February next they will find themselves in a very unpleasant position, unless by that time they have altered their tactics.

As far as can be gathered, it would appear that a deadlock has been reached in the proposed new German commercial treaties which were lately drawn up by the Imperial Government. It will be remembered that some of the provisions of these treaties excited much indignation in Austria Hungary, and especially in the latter country. Indeed, so hostile was the feeling aroused that it was deemed prudent in high official circles in Berlin to pause, as, were the irritation to increase in Hungary, the Triple Alliance might come to a sudden end. It is not impossible that the purely official element in Berlin was very glad of the opportunity to check the progress of the treaties; for to do the German Government no more than justice, it has no real desire to pass the treaties. It was forced to introduce many of their provisions in deference to the wishes, and, indeed, obstinacy, of some of its staunchest supporters amongst what are called the Junker class.

Every one can see now what a grave mistake even so eminent a man as the late Prince Bismarck made in the policy which he consistently pursued against the Roman Catholics, of whom so large a part of the population, particularly in Southern Germany, is composed. To form a great Catholic Party, as it has come to be called, was one of the gravest errors of his internal administration. In the natural a tire sides. The adjoining building, to be erected by course of things the Catholic Party would have been moder-

Per the writers, reper to the later to the l

ately conservative or moderately liberal, rather probably the former than the latter; but in any case there would never have fallen a hostile party arrayed against the Government.

Prince Bismarck's bitter hostility to the Vatican and all its work made this attitude on the part of the Catholics impossi-Conse ble and the result was the formation of the Centre. quently the German Government has to rely for support in the Reichstag to an extent quite disproportionate with their numbers on the ultra-Conservative or Jingo Party. These men are for the most part great landowners, and they have suffered as have the landowners of the whole landed interest numbers on suffered as have the landowners of the whole landed interest in the old countries from the great depression that has vis-ited the agricultural interest in every country which has been for a long time inhabited. The Junker Party are natur-ally not economists, and they hope to improve their position and in some cases to save the wreck of their fortune by inand in some cases to save the wreck of their fortune by inducing the Government to pass extravagant duties for the
sole and simple purpose of protecting agriculture. Now, at
the present time Germany is making extraordinary progress
as a manufacturing and commercial nation, and the Government rightly wishes to assist it in that direction. The commercial treaties, however, hamper the Government in the
pursuit of this policy; and were the Government in a
position to rely upon some support other than that of the
Jingo Party, it would be manifestly for the interests of
Germany.

Jingo Party, it would be manifestly for the interests of Germany.

Money remains very easy in London. Day to day loans are readily obtainable at between 1 per cent and 1½ per cent and even in the discount market under 2½ per cent is asked for bills maturing in the middle of January, and only the Bank rate, that is 3 per cent, for what are called long-dated or six months' paper. This is wholly due to the enormous amount of French money at present being employed in London. Estimates of its magnitude vary; but all are agreed that it is unprecedentedly large. Of course after this country has been at war for two whole years, it is of immense advantage to London to have a large amount of French money employed here; but at the same time it cannot be denied that the French bankers have a control over our money market that is not wholly desirable. Of course our money market that is not wholly desirable. Of course the great French bankers would do nothing to cause stringency here if they could avoid it; but in the event of an occasion arising when they would want to withdrawgold, rates

ency here if they could access on arising when they would want to without would rise rapidly.

Upon the Stock Exchange business remains as lifeless as ever. The certainty that we have once more to face a Government war loan depresses consols and high class investment securities. The speculative markets are weak, partly markets are weak, partly as to the mood of the great operators the mining sections

upon your side, and of course so far as the mining sections are concerned, owing to the war.

Although so far as produce is concerned, we are only importing on any considerable scale jute from India, nevertheless the India Council is experiencing quite a remarkable demand for its drafts. At this time 12 months ago it was only offering 25 lacs a week. On Wednesday last it offered 50 lacs, and the total applications exceeded 750 lacs at prices ranging from 1s. 3 31-32d, to 1s. 4d, per rupee. The total sales for the financial year so far have realized 634 millions sterling, comparing with 4½ millions sterling, comparing with 4½ millions sterling, comparing with 4½ millions sterling 12 months ago.

The following return shows the position of the Bank of England, the Bank rate of discount, the price of consols, &c.

Messrs, Pixley & Abell write as follows under date of Oc tober 17:

tober 17:

Gold—The demand for Germany and Austria has been particular, keen, and the whole of the large arrival from the Cape has been taken for Berlin. In addition, £230,000 has been purchased from the Bmin German gold coin. The Bank has lost £450,000 since our las, or in German gold com. The Bank has lost 2 200,000 aines our last of which £200,000 has been sent to Egypt. Three hundred and elergic thousand pounds sterling is due from the East on Monday. Attribute the control of the Australia, £16,000; Cape Town, £414,000—total, £480,0 ments: Calcutta, £10,000.

Silver—The downward tendency of silver has continued. The Simi have bought regularly, but only for small amounts and also only by have bought regularly, but only for small amounts and also only her forward delivery. The cash market is the weak feature, and we quest to-day 26° 16° d. cash, 26° 561. forward, with perhaps a steader too in the absence of sellers. The price in India is Rs. 67° 4. Arrivals: Re York, £147,000; Australia, £2,000-total, £149,000. Shippen Bombay, £85,000.

Bombay, 255,000.

Mexican dollars—These coin have dropped slightly, in symptom with silver, but there has been a fair business, and we quote 25 id. Arrivals: New York, £31,000.

The quotations for bullion are reported as follows:

WALL STREET. FRIDAY. NOV. 1. 1901.—5 P. M.

The Money Market and Financial Situation.—Another illustration of the sensitiveness of the security markets has been given this week. It was easy to imagine a week ago that the increased volume of business then noted and the more buoyant tone which prevailed foreshadowed a removal of some hindrances to the free investment of capital that haverestricted operations in Wall Street for some time past. But the weakness which developed on Monday showed how vain were such imaginings and gave the illustration referred to. On that day there was talk of probable gold shipments and also some disappointment because the expected settlement of Northern Pacific affairs was not announced. No doubt the former was chief cause of the weakness mentioned. Later nearly \$3,000,000 of gold was shipped to Paris, and the local foreign exchange market weakened. On Thursday the Bank of England advanced its minimum nate of discount from 3 to 4 per cent, causing a recovery in on Thursday the Bank of England advanced its minimum nte of discount from 3 to 4 per cent, causing a recovery in exchange rates here. Evidently the foreign financial situation continues to be somewhat strained, but the local money market remains easy, as heretofore reported, with ntes practically unchanged. A remarkable state of industrial scivity throughout the country is evidenced by clearing bouse returns, railroad earnings, and a shortage of rolling stock to handle the traffic reported in many cases.

The open market rates for call loans on the Stock Exchange dring the week on stock and bond collaterals have ranged from 3½ to 5 per cent. To-day's rates on call were 3½ to 5 percent. Prime commercial paper quoted at 4½ 65 per cent.

The Bank of England weekly statement on Thursday howed a decrease in bullion of £696,888, and the percentage of reserve to liabilities was 45-63, against 49-00 last week; the discount rate was advanced from 3 to 4 per cent. The Bank of France shows an increase of 16,775,000 francs in gold and 475,000 francs in gold and 475,000 francs in silver.

ingold and 475,000 francs in silver.

The New York City Clearing-House banks in their statement of Oct. 26 showed an increase in the reserve held of 1.502,000, and a surplus over the required reserve of 14.713,175, against \$15,465,775 the previous week.

State and Railroad Bonds.—Sales of State bonds at the Board are limited to \$600 Tennessee settlement 3s at 95 and \$7,000 Virginia fund, debt 2-3s at 96½.

The railway bond market has not maintained the improvement noted last week, but lapsed back into its former dull, narrow and featureless condition. Daily transactions have averaged about \$2,200,000 par value and only a few issues could be rightly described as active. The market has been unusually steady, although generally firm in tone, and changes in quotations were in most cases to a fractionally higher level. The small list of active bonds includes Atchison, Baltimore & Ohio, Burlington & Quincy, Consolidated Tobacco, Reading, St. Louis Southwestern, Southern Pacific and Union Pacific issues.

Stock and Bond Sales.—The daily and weekly record of stock and bond sales at the various stock Exchanges, formerly given on this page, has been transferred to a place by itself. It will be found to-day on page 948.

Railroad and Miscellaneous Stocks.—The stock market has again been irregular. There was a general decline on Monday, averaging from 1 to 3 points and including several railway issues noted as strong last week. Subsequently prices recovered somewhat but there has been no general uniform movement in any direction.

Michigan Central was conspicuous for an advance of 30 points on bids that brought out only a few shares and other stocks with which Vanderbilt interests are identified were more or less prominent. The anthracite stocks were notably strong, Central of New Jersey advancing 10 points and Lackawanna 7½ points. On the other hand, St. Paul, Union Pacific, Southern Pacific and Louisville & Nashville were inclined to weakness, and Chicago & North Western was irregular, covering a range of 4½ points Of the local transportation issues Manhattan Elevated advanced over 3 points and Metropolitan Street Railway declined nearly as much.

Amalgamated Copper was the feature of the miscellane-ous list, moving up and down over a range of 5 points. American Sugar Refining and the iron and steel issues were generally weak.

Outside Market.—The week in the outside market has been dull and lifeless, and prices have moved irregularly. Only in a few instances, however, are material changes noted. The most notable drop occurred in American Can stocks, which sold as low as 17% for common and 64% for preferred. They close to-day at 18 and 65, against 19% and 68 last Friday. The decline was attributed to the failure of the U.S. Steel Corporation to take over the American Can noted. The most notable drop occurred in American Can stocks, which sold as low as 17\(^{5}\){s} for common and 64\(^{5}\){for preferred.} They close to-day at 18 and 65, against 19\(^{5}\){s} and 68 last Friday. The decline was attributed to the failure of the U. S. Steel Corporation to take over the American Can Co. Standard Oil also manifested weakness. It sold a week ago at 720, but on Wednesday it went to 715 and to-day, with a fair amount of trading, it sold down to 707. On the other hand, Dominion Securities stock moved up, going from 83\(^{5}\){s} to 86, but receding to 84\(^{4}\){s}, the closing price. International Salt certificates advanced from 32\(^{5}\){s} to 33. St. Louis Transit stock 10se from 27\(^{4}\){s} to 28\(^{4}\){s}, and United Railways of St. Louis went up to 83\(^{4}\){s} from 82. Snap Hook & Eye also gained, rising to 40\(^{7}\){s} from 39. Some of the copper stocks have been fairly active, prices moving both ways; thus, while Apache Copper went down from 5\(^{5}\){t} to 45\(^{5}\){s}, Tennessee Copper moved up from 12 to 13\(^{5}\){s}, and White Knob rose to 17\(^{4}\){s} from 15. Adams Copper also advanced from 35 to 37\(^{4}\){s}, while Union Copper was firm at 4\(^{4}\){c} 4\(^{4}\){s}. Kansas City Ft. Scott & Memphis securities have been quiet and steady. The new Mexican National bonds and stocks have been very dull and close at fractionally lower prices. The outside quotations will be found on page 048.
